RISE LEARNING ZONE MANAGEMENT OF MEDICATION STATEMENT

RISE Learning Zone is committed to providing such support as is necessary to enable individual service users to take their medication in a safe and supportive environment.

RISE Learning Zone's overarching philosophy is one of enabling service users to remain as independent as possible and to receive assistance with the administration of medication only where necessary, subject to a person specific medication risk assessment.

Service users will be treated as individuals and at all time due consideration will be given to their age, beliefs, opinions, experience, ability, culture and any other factor that could reasonably be foreseen to have an impact on their lives.

The prescription of medication and the provision of instructions for administering it will solely be the responsibility of the young person. The young person is responsible for being aware of when they need to take their medication and for taking their medication home at the end of each session. The young person must ask a worker in order to gain access to their medication, which will be held in a locked cabinet.
